CRUSH-ALL® is an IMPACT or JAW crusher in a bucket. Fully ADJUSTABLE to make nearly any size you desire. RE-BAR and wire are no problem. Only two (2) reversible blow bars or jaw dies. Bars are available in a variety of materials. Jaw dies are made from manganese steel. CRUSH-ALL® is available in several models to fit nearly every application. Please refer to our "excavator requirement chart" when deciding what model CRUSH-ALL® will work for you. Don't worry about the pin connection. We supply replaceable bushings to adapt CRUSH-ALL® to nearly every pin size. Quick disconnect hitches are no problem. Hydraulically speaking, most excavators with a 3rd valve or hammer kit will operate CRUSH-ALL® with only minor modifications. Regardless, we provide all the necessary schematic diagrams you will need to plumb your machine if required. We make it simple and easy.

Our in house hydraulic technicians are available to do complete installations including plumbing at your site or ours!

\*Results based on CR75 & 125 will vary based on operator skill level and various other factors. Please consult your sales rep. for details.
